

Miloni Atul Shah

Software Engineer | Java · Spring Boot · React · Microservices · AWS · AI

United States | 571-494-7219 | miloniashah12@gmail.com | [LinkedIn](#) | [GitHub](#)

Education

Master of Science in Computer Science, George Mason University

Aug 2023 - May 2025

GPA: 3.60 / 4.00

Virginia, USA

Experience

Stateable

Remote, United States

Software Engineer

Jul 2025 - Jun 2026

- Built a production AI-powered ETL pipeline (Python, Claude API) that standardized extraction of 100+ unstructured insurance document types at ~95% accuracy, auto-parsing and loading structured data into MongoDB and eliminating manual extraction entirely.
- Improved AI agent workflows to fix incorrect data extraction in production insurance document processing, reducing processing time by ~75% & improving extraction accuracy by ~20%, significantly reducing manual review fallback; reviewed and contributed to TypeScript frontend code to validate structured data display on the UI.
- Maintained zero-downtime production releases for business-critical commission and quote-processing systems by managing containerized deployments via Docker, AWS Lambda, and GitLab CI/CD.

Accenture

Maharashtra, India

Software Engineer - Application Development Associate

Aug 2021 - Jun 2023

- Developed Java-based automation infrastructure integrated with microservices & REST APIs to replace 200+ manual QA workflows, cutting regression execution time by ~30% & accelerating release cycles across distributed cloud services.
- Identified root causes of 10+ microservice failures through Linux log analysis, coordinating fixes with cross-functional engineering teams and contributing to peer code reviews within Agile sprints.
- Delivered 3-4 user stories per sprint while independently presenting solution demos to client stakeholders, balancing hands-on development with client communication across moderately complex initiatives.

Projects

Event Booking Platform

Apr - June 2026

Java, Spring Boot, Spring AI, Maven, Kafka, Redis, MongoDB, Docker, Stripe

- Designed a microservices backend for an end-to-end event platform, using Apache Kafka for async inter-service communication and Redis caching with optimistic locking to prevent double-booking under concurrent load, reducing repeated database queries by ~60%.
- Integrated Stripe for payments with automated refund handling, and secured all APIs with JWT-based authentication and RBAC, achieving 80% unit test coverage via JUnit 5 and Mockito.
- Layered natural-language event search and personalized recommendations on top of the core booking system using Spring AI with LLaMA 3.3.

Multi-Tenant Survey Platform

Feb - May 2025

Java, Spring Boot, React, MySQL, JPA/Hibernate, Flyway, AWS, Docker, K8s

- Built a multi-tenant survey platform with dedicated MySQL schemas per tenant and a React frontend, ensuring complete data isolation across organizations for survey creation, response collection, and result aggregation.
- Deployed on AWS EC2 with Kubernetes for orchestration and scaling to support 200+ concurrent users, and automated CI/CD via Jenkins to eliminate manual deployments.

Technical Skills

- Languages & Frameworks - Java, Spring Boot, Spring Security, Spring AI, Python, REST APIs, GraphQL, JPA
- Databases & Messaging - PostgreSQL, MySQL, MongoDB, Kafka, Redis, SQL optimization, indexing, ACID transactions
- Cloud, DevOps & Security - AWS (EC2, S3, Lambda, RDS, CloudWatch), Docker, Kubernetes, GitLab, Jenkins, JWT, RBAC
- AI & Automation - Claude API, Claude Code, LLM integration, AI agents, RAG, Prompt engineering
- Testing & Frontend - JUnit 5, Mockito, Selenium, Postman, React, Vue.js, TypeScript, HTML5, CSS3

Awards & Certifications

- GraphQL by Example - Practical experience building full-stack GraphQL apps using Node.js, Express, Apollo, & React.
- FY23 ACE for exceptional outcomes, strong work ethics & delivering excellent customer service
- Certification - Java Programming with JDBC and Networking, Maharashtra Business Training Board.
